2	Robotic	Robotics is an interdisciplinary branch of engineering and science that includes mechanical engineering, electronic engineering, information engineering, computer science, and others. Robotics deals with the design, construction, operation, and use of robots, as well as computer systems for their co	2019-12-18	2019-12-28	1226
3	What is CSV file?	CSV is a simple file format used to store tabular data, such as a spreadsheet or database. Files in the CSV format can be imported to and exported from programs that store data in tables, such as Microsoft Excel or OpenOffice Calc. CSV stands for "comma-separated values".	2019-12-19	2019-12-29	1226
12	What is CSV file?	CSV Stand for Comma , Saperated , Value file and are the microsoft exel file.	2019-12-28	2020-01-07	1227
13	main components of communication process	1. Context - Communication is affected by the context in which it takes place. This context may be physical, social, chronological or cultural. Every communication proceeds with context. The sender chooses the message to communicate within a context. 2. Sender / Encoder - Sender / Encoder is a person who sends the message. A sender makes use of symbols (words or graphic or visual aids) to convey the message and produce the required response. For instance - a training manager conducting training for new batch of employees. Sender may be an individual or a group or an organization. The views, background, approach, skills, competencies, and knowledge of the sender have a great impact on the message. The verbal and non verbal symbols chosen are essential in ascertaining interpretation of the	2019-12-28	2020-01-07	1227
14	PHP: Removes duplicate values from an array	The array_unique() is used to remove duplicate values from an array. Note: The keys are preserved. array_unique() sorts the values treated as a string at first, then will keep the first key encountered for every value, and ignore all following keys. It does not mean that the key of the first related value from the unsorted array will be kept.	2019-12-29	2020-01-08	1226
15	PHP: array_key_exists() function	PHP: Checks if the given key or index exists in an array The array_key_exists() function is used to check whether a specified key is present in an array or not. The function returns TRUE if the given key is set in the array. The key can be any value possible for an array index. Version: (PHP 4 and above) Syntax: array_key_exists(array_key, array_name)	2019-12-29	2020-01-08	1229
16	Histry of Font Awesome	Freemium. Website. fontawesome.com. Font Awesome is a font and icon toolkit based on CSS and LESS. It was made by Dave Gandy for use with Twitter Bootstrap, and later was incorporated into the BootstrapCDN	2019-12-29	2020-01-08	1229

29	jQuery Animation Effects	The jQuery animate() method is used to create custom animations. The animate() method is typically used to animate numeric CSS properties, for example, width, height, margin, padding, opacity, top, left, etc. but the non-numeric properties such as color or background-color cannot be animated using the basic jQuery functionality.	2020-01-27	2020-02-06	1227
30	Ajax	Ajax stands for Asynchronous JavaScript and XML. Ajax is a group of interrelated web development techniques used on the client side to create interactive web application. It uses a combination of HTML and CSS to markup and style information. It is about of updating parts of web page without reloading the whole page. Ajax combine a set of known technologies in order to create faster and more user friendly WebPages. It allows the web page to change it content without reloading the whole page. Ajax provides functionality to create a robust web application. If an Ajax web application is coded properly it will run faster than and secure as a non-Ajax program. Ajax operates more like an application rather than standalone program.	2020-01-27	2020-02-06	1227
